

## Noah Walker

Atlanta, Georgia | (404) 414-4219 | noahw2025@gmail.com |

---

### Education

#### Georgia State University – Atlanta, GA

Senior, Computer Science

- **GPA:** 3.93 – President's List (2 semesters), Dean's List (all other semesters)

### Experience

#### CTO, MICA Clean Air | Atlanta, GA (2022 – Present)

- Oversaw deployment and management of Kaiterra indoor air quality sensors through our partnership with PlanetWatch.
- Directed data aggregation efforts to establish baselines and provide actionable health metrics.
- Delivered large-scale solutions for major clients such as Jackson Healthcare (60 indoor and 2 outdoor installations).

#### Director in Training, NEW Canvassing Experience | Atlanta, GA (Jan 2023 – Jan 2024)

- Managed and coached a team of 5–10 fundraisers, achieving key performance targets for nonprofit clients.
- Secured \$200K in average yearly recurring donations through innovative fundraising strategies and team leadership, consistently ranking as a top performer.

### Projects & Technical Highlights

#### Multi Project Exploration

- Developed multi-function Python scripts to handle tasks based on intent, capable of multiple functions.
- One function (via text prompts) can write/request code, execute it, analyze outputs, and iterate for accuracy.
- Explored scripting for Data scraping, API usage for structured data, Open-source models such as CNN's, LSTM's and TTS for different use cases, created pipelines for tasks such as Instagram Content creation, and more.

#### Ethereum Miner Build & Analysis

- Designed and built a custom 6-GPU Ethereum mining rig, mastering computer assembly and BIOS interaction.
- Explored the algorithms behind different projects and conducted cost-benefit analyses of mining operations, including algorithm mechanics, earnings potential, and energy efficiency.

#### CHIA Blockchain Proof-of-Space Project

- Constructed a storage-optimized computer system using SSDs and HDDs to support CHIA's proof-of-space concept.
- Analyzed interactions between hardware, networking, and blockchain infrastructure to maximize efficiency for plotting onto 90 TB.

#### Helium IoT Network Deployment

- Deployed over 20 Helium IoT nodes for large-scale residential applications, focusing on improving connectivity and range for LoRaWAN frequencies.
- Gained a comprehensive understanding of IoT infrastructure, from hardware setup to network integration.

### Technical Skills

- **Programming Languages:** Python, C
- **AI & Machine Learning Frameworks:** PyTorch, Hugging Face Transformers, TensorFlow, OpenAI APIs
- **Tools & IDEs:** VS Code, GitHub, Linux/Unix Command Line, Jupyter Labs
- **Web Development/Interaction:** REST APIs, basic Java, CSS, and React
- **System-Level Programming:** Process Pipelines, Open-Source Model Integration, Dependency Management
